

PHP Basics 01

Follow the Instructions

Marks (5)

- Follow the tutorial in the class and create the basics of a calculator using PHP.
- Create a php page with the following name: Cal_php.
 - Note: Place the file in **Xampp/htocs/SWE322/02_Lab**
 - Add this folder to GitHub as it was shown to you in our first Lab Lecture.
- In the file add four methods:
 - add(x,y)
 - subtract(x,y)
 - multiply(x,y)
 - divide(x,y)
 - Note: each function should return the result of the mathematical expression. E.g.:

```
function add(x, y){  
    return (x+y);  
}
```

Submission is on the same day as the Lab (before Lab Lecture end)
