

PHP Basics 03

Follow the Instructions

Marks (5)

Create the following classes for a Web application to display book search result.

Classes:

Book	BookList	Style
-ISBN -Author -Title -Description	- Book[] Books.	- font-family - font-size - font-color - padding - margine
+GetBookISBN() +GetAuthor() +GetTitle() +GetDescription() +DisplayBook()	+GetBookList() +SeachBookList() +DisplayBookList();	+ applyStyle()

Test each class by using:

DisplayBook() in Book Class.

DisplayBookList() in BookList

ApplyStyle to a paragraph element using ApplyStyle() in Style class.
